Problem Statement

Wonder what's keeping your business from growing to the next level?

Using outdated technology

Dealing with legacy systems is an ongoing challenge for many businesses. They're inflexible, immobile, complex, too expensive to maintain, and mostly managed by specialists. The truth is, most of the time you are better off with newer applications.

Using various business software

Do you have one application for finance, another for sales, a third for marketing, and so on? Why?

With separate apps for every part of your business, heaps of data get duplicated across platforms without making any sense. You're also spending a lot of time training your employees on multiple pieces of software.

Companies that don't have a core, unified solution miss out on the big picture: sales, marketing, finance, HR, and operations can "Work as One" to keep customers happy, surpass competition, and reap profits.

Introducing

ANALYTICS FOR ZOHU ONE

With the Zoho One Analytics Dashboard tab, users can track KPIs and trends across business functions, including financial health, sales and marketing performance, and inventory counts, all from one place.

With over 500 pre-built reports and dashboards, plus the option to create your own, users will be able to blend data for cross-functional analytics right out of the box.

SAY HELLO TO ZIA

Zia, Zoho's AI-powered conversational assistant, is extended to Zoho One. Users can issue commands via text chat or voice across various applications.

Zia can extract real-time, contextual business insights from varied data sources, on command.

SIMPLIFYING USER SEARCH

Zia Search is a powerful method of navigating across company data. It can provide a quick, direct route to any form of information that your business keeps in the Zoho One suite.

Search across all apps to find anything you need, from documents and business data to colleague contact information. Then take contextual actions, like launching a presentation, assigning a help desk ticket, or starting a chat.

Zoho One now lets users view and configure apps enrolled to them by admins using the Zoho One mobile app launcher

ZOHO ONE MOBILE APP

Zoho One administrators can access and control Zoho One wherever or whenever it's convenient for them. The mobile app lets admins stay informed about their business, manage automatic user app provisioning and de-provisioning, view reports, formulate security policies, create groups, and more, from anywhere.

THE COMPASSIONATE CONCIERGE

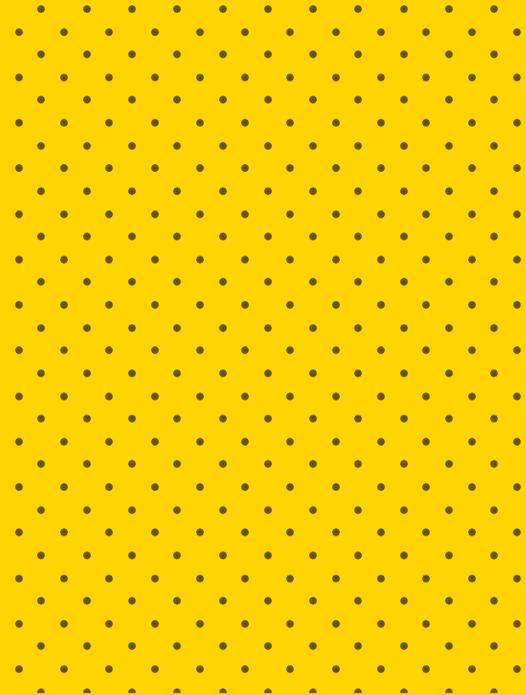

Zoho One has more than 40 web apps and just as many for your mobile device. That's precisely why new users tend to feel overwhelmed. The Zoho Concierge provides a human touch in the world of software. When you contact Zoho One's concierge service, one of our experts will make the effort to understand your business requirements and provide a solution using Zoho's range of apps.

CUSTOMER SUCCESS STORIES

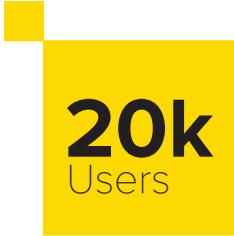

IIFL, a leading finance and investment services company in India touches a new high with Zoho One

"At IIFL, we have started using Zoho One, which includes their super-powered CRM, Email, Campaign Management, Survey, Social Media Management, Sales IQ, Creator, Internal Chat and HR products across various entities. Honestly, there is no better value that Zoho One can offer, especially at this low a cost! Zoho One does change the way businesses operate by offering a whole suite of apps that are not only tightly integrated with each other but also play well with third-party applications. These vast varieties of solutions are easy to configure and customize which in itself paves for an efficient cross-selling platform."

The Warehouse Group, New Zealand's largest retailer, experiences better control through Zoho One

"Having data on one platform has also streamlined how we service customers and has unleashed incredible energy within our company. Our response times have been reduced significantly by days, to where we are now able to resolve customer issues in real time. Zoho One is truly the Operating System for any business!"

Purolite, a manufacturing company, boosts productivity and performance through Zoho One

"Zoho One has brought our company closer together. What started out as a North American implementation for 50 users ended up being a global roll-out for more than 500 employees. We find ourselves executing more efficiently due to the shared data and analytics we now have across departments and offices. We'll continue to explore applications on Zoho One—this is just the beginning of further system expansion we can achieve as a Zoho customer."

Apex Solar, a leading solar company, gains better visibility with Zoho One

"Zoho One makes information sharing across apps and channels seamless. We weren't able to accomplish that prior to using Zoho One due to disconnected platforms and the inability of individual vendors to keep up with our growing needs. Our business has been growing at a very fast pace with headcount increasing 20% just within the last year, and we look forward to supporting continued growth using Zoho One."

EXPERTS OPINE ON Zoho One

“Businesses are increasingly utilizing technology with more automated tasks, incorporation of data, analysis of information, and predictive outcomes and alternatives. Intelligent technology is enhancing business processes and bringing more employee insights at warp speed, enabling the enterprise to quickly bring forward more personalized responses. Zoho One provides a foundation for enterprise intelligence with its Zia, Dashboards, and Search capabilities across the Zoho One platform.”

Mickey North Rizza

Program Vice President

Enterprise Applications and Digital
Commerce at IDC

“To already have more than 12,000 businesses using Zoho One within its first year, ranging from one to 20,000 users, proves the value proposition of Zoho's integrated platform appeals to companies of all sizes. With so many apps integrated together, Zoho One not only makes it easier for businesses to work more efficiently, but having this integrated data structure allows Zoho to leverage its AI and machine learning technologies to provide users a more diverse and complete data set. This has the potential to combine productivity gains with more impactful customer insights, giving businesses a competitive advantage.”
